## PROFESSIONAL EXPERIENCE

**CSWDO Santa Rosa – Project Leader** Santa Rosa, Laguna, Philippines September 2022 – March 2023

- I work as a Capstone Lead Developer for our college group. Our team's focus is to complete our final thesis capstone project, which is a significant part of our degree.
  - Lead a team of developers working on the capstone project.
  - Design and implement software solutions based on project requirements.
  - Provide technical guidance and mentorship to team members when needed.
  - Communicate with advisors and faculty to present project updates and seek feedback.
  - Troubleshoot and resolve technical issues that arise during the development process.
  - Presented the capstone project at IT Expo, earning positive feedback from faculty and peers.
- I lead the development efforts of our team. I work closely with other team members to code and build our project. I also coordinate with our advisors and make sure everyone is on the same page.
  - Collaborate with team members to plan project goals, tasks, and timelines.
  - Coordinate regular meetings to track progress, address challenges, and ensure alignment.
  - Ensure the final project meets all specifications and delivers the intended functionality.
  - Prepare and deliver presentations showcasing the project's progress and outcomes.
  - Conduct code reviews to maintain code quality and adherence to best practices.
  - Actively contributed to a significant portion of the project's coding, showcasing technical skills and dedication that inspired team members and ensured project completion.

**LQTech Security Solutions – Software Developer** Santa Rosa, Laguna, Philippines March 2023 – June 2023

- As an intern at LQTech Security Solutions, I am responsible for leading the development of their Inventory system. LQTech Security Solutions is a company that specializes in providing various security solutions to clients, including technology-based systems and services designed to enhance security measures.
  - Collaborated with the development team to gather requirements and design specifications for the Inventory system.
  - Implemented front-end and back-end functionalities of the system, ensuring smooth navigation and accurate data management.
  - Interacted with various departments, such as inventory management, sales, and operations, to understand their needs and incorporate them into the system's features.
  - Conducted testing and debugging to identify and resolve any issues, ensuring the system's reliability and functionality.
  - Contributed to regular team meetings, providing updates on the progress of the Inventory system's development and addressing any challenges encountered.
